

Graphic Design: Interactive II – Spring 2017

Project 2: Restaurant Website

Due Date: Friday, March 10 at 5:00 pm Mountain Time.

Project Description

You are going to develop a website for a restaurant. The name and type of the restaurant is up to you.

Each page of the website will need a header, content area, sidebar, and footer. Each page of the website should have the following information:

- Restaurant Name (header)
- Navigation (header)
- Daily Specials (sidebar)
- Hours of Operation (sidebar)
- Address (footer)
- Phone Number (footer)
- E-mail Address (footer)
- Link to Google Maps (footer)

The website will include the pages listed below. The content area for each page is also described for you.

Homepage

The homepage will include a photo, a one paragraph welcome letter from the owner, and a customer testimonial.

Menu

The menu page will include a table of menu items and prices. The menu page needs to include at least 4 categories of items, and each category needs to include at least 4 menu items.

Photo Gallery

The photo gallery page will include a grid of thumbnail photos in 4 columns. When you click on a thumbnail photo, a larger version of the photo should appear in lightbox format using Fancybox. The photo gallery page needs to include at least 16 photos.

Testimonials

The testimonial page will include customer testimonials. Each customer testimonial will be one sentence long. The customer name and photo must be included for each testimonial. The testimonials page needs to include at least 4 testimonials.

Styling

You do NOT need to design a logo for the restaurant. You will need to develop a color scheme for the website that consists of at least three colors. You will need to use at least two Google Web Fonts.

Grading

This project is not a design project. While you need to make your website look presentable with a color scheme, the grading focus of this project will be on:

- Using appropriate HTML tags for your content.
- Using CSS to style HTML content.
- Cleanliness and organization of HTML and CSS, especially code indentation.
- Making sure all of your internal links work.
- Making sure your Fancybox integration works.
- Making sure your Google Web Fonts integration works.

Turning In Your Work

Your project must be e-mailed in ZIP format to projects@utepinteractivecourse.com by Friday, March 10 at 5:00 pm Mountain Time. Late work will not be accepted. You will receive an e-mail confirmation from me when I receive your project files.

Goals

- Tuesday, February 28 - You should have the HTML of your homepage built. Build your homepage first, and then build your navigation to link your pages together.
- Thursday, March 2 - You should be done with the HTML of your entire website, and should be styling your website using CSS.
- Tuesday, March 7 - You should be done integrating Fancybox for your photo gallery.
- Thursday, March 9 - Final changes and updates.
